Brightening Tables, Uniting Hearts

In an increasingly fast-paced and turbulent world, we have faced numerous uncertainties over the last few years, including health, the economy, climate change, natural catastrophes, war, and immigration. While all of this was happening, we began to improve our living conditions and spend more time with our loved ones to slow down and breathe a little. Future trend analysts recognized the value of humanity's efforts and concluded that new life trends were evolving in this direction. As a result, by 2024, we will all be sharing our time and tables with people that make us happy. We will live life to the fullest adding vibrant LAV to our little moments.

Our primary objective for designing our products is to provide joy to our customers' lives, recognize their needs, and introduce them to new ideas. In this regard, based on trend agency projections and our design team's observations at current exhibitions and events, we introduced new designs to our product line this year, as well as new collections that will be combined to create cozy tables. In 2023, we exhibited the LAV collections, which we distinguish each year, at many national and international events to gain new followers and collaborations, including Ambiente Frankfurt, The Inspired Home Show Chicago, NRAS Chicago, Züchex Istanbul, Host Milano, and Gastromasa Haliç. At those gatherings, we introduced thousands of visitors to LAV's products.

We did not lower our investments since design cannot be separated from production and production from investment. We expanded our product line for professionals by introducing tempered glass, increasing the number of stackable products, and boosting the selection of fine-rimmed items. We developed our machinery line and invested in the production of double-piece wine glasses and plastic cap injection machines. We are delighted to inspire and produce for our users, who serve as the primary catalysts for our endeavors and compel us to innovate, establish a unique identity, and create value.

We strive for **a better world, better products, and a better company** throughout the journey of glass, from design to manufacture, shelves to tables. In this sense, we continue to focus on building long-term value under the motto

'*Journey through Glass*'. LAV manufactures 2 million pieces of glass daily in two mega manufacturing facilities with a total covered area of 120 thousand square meters and an open-air area of 300 thousand square meters. As a result of the efficiency measures we implemented, we cut our overall consumption by 9% over the previous year. In addition, we boosted the proportion of white-collar female employees to 49%, female executives to 14%, and total female employees to 17%. Since 2020, we have gotten several accolades and favorable feedback on a local and worldwide scale, but we have yet to meet our 2025 sustainability goals. We are also conscious that we have a long way to go before achieving this goal.

Gürok Group, of which we are delighted to be a part, has left 75 years behind and grown into a massive family that spans from Kütahya to New York, Antalya to the Maldives. Our group, founded in 1948 by Rıza Güral in pursuit of a dream, continues to work with all its strength through the companies operating in various fields such as glassware, tourism, construction, and adding brand new ones with our successfully realized investments. The Gürok Group, which has devoted nearly a century to value creation and production, continues along this path with the motto "**Act Brave, Do Good, Think Unlimited.**" By adhering to these principles, the group spearheads advancements in the sectors it operates in and establishes novel benchmarks and innovations to propel Turkey forward. On the other hand, it strives for a better tomorrow through the development of innovative, sustainable products and initiatives that are beneficial to human well-being and the environment.

Many wonderful achievements await us as we mark the end of our republic's 100th anniversary.

Ümit ZOR

about LAV

At LAV, our goal is to turn inspiring moments into lasting memories! Our enthusiasm for glass began on the first day we were founded in 1994, and we have been dedicated to providing the best at every location we reach in the world through innovation, sustainability, and technology ever since.

We at LAV think that every moment of life is worth celebrating, therefore we've made it our aim to bring color into people's lives with our innovative, unique, and beautiful designs. From glasses to goblets, bowls to containers, each of our goods is meticulously designed and crafted to bring value to every house, table, and moment.

At LAV, we take sustainability and the future of our planet extremely seriously, employing environmentally friendly materials and implementing water and energy-saving methods. These attitudes and measures make us the glassware manufacturer with the lowest water and electricity consumption in our industry on a global scale.

Our dedicated staff of 2,000 professionals works hard to bring our products to tables all around the world. We have an extensive sales and distribution network that stretches from the United States to China and covers over 140 countries. We are the world's fifth largest company in our field, with a daily manufacturing capacity of 2 million glass items and two production buildings totaling 300,000 square meters. We are one of only three companies in the world that develops its manufacturing technology for glass items. Our R&D activities are carried out in our own Technopark.

As LAV, we are proud to be a local manufacturer that adds value to moments to create unforgettable memories around the world and we keep striving for excellence every day with the principles of "act brave, do good, and think unlimited".

We sincerely listen to the voices of our customers and work with all our strength to continue to offer them innovations and develop special solutions for their needs.

innovation

We place high importance on innovative ideas and technological developments at LAV, and with the support of our young personnel, we have positioned innovation at the heart of all divisions. Our R&D section is responsible for the majority of our original efforts, with innovation and technology serving as guiding principles. We are one of only three companies in the world with our Technopark to build our own production technologies in our industry.

business partnerships

LAV focuses on the specific demands of each business partner and provides the most appropriate, inventive, and creative solutions to these needs. Through transparent and always open communication channels, we ensure that our business partners are included in all processes. LAV's objective is to help our business partners increase the value of their brands and develop meaningful connections with consumers.

culture

At LAV, we believe that the secret to our success is a healthy work atmosphere that encourages free thinking and innovation while highlighting knowledge, ability, and competence. We endeavor to provide all of the necessary conditions for our employees to grow as professionals and individuals. We dedicate ourselves to empowering and supporting our staff through the recruitment process, in-house training, and reward programs.

The world of innovative and sustainable production!

LAV, the world's fifth-largest glassware producer, is an internationally recognized brand with state-of-the-art production processes and a commitment to constant innovation. Our two leading mega-factories are capable of putting out 2 million units per day. Manufacturing doesn't stop at LAV with the delivery of goods to customers; under the concept of "factory in a factory" we also develop and produce our own machinery to guarantee the highest standards of quality and productivity.

LAV is a globally recognized and respected brand, as evidenced by our exports to 140 different countries. Our commitment to sustainability is yet another way in which we stand out; we use significantly less water and energy than any other company in the glassware sector. We have over 2000 expert employees and take great pride in being a sustainable, innovative, and high-quality Turkish brand known and appreciated around the world.

High standards

In order to ensure that all of our clients and business partners, irrespective of their sector, scale, or global location, have a transparent and impeccable experience with us, LAV supports the notion that standardized outcomes must be attained under all circumstances via an integrated, methodical, and foundational strategy. To achieve the highest attainable standardization of results, we obtained certifications with global validity on crucial topics including production, marketing, communication, licensing, and sustainability through the implementation of Total Quality Management.

By obtaining these certifications, we gain access to new markets and comply with industry-specific regulations and requirements, thereby expanding our clientele's options and our own market presence. In addition to providing us with a competitive edge, our dedication to excellence has facilitated enhancements in operational effectiveness and output, enabling us to offer superior goods and services at more rational costs.

This is how we ensure that LAV products find their way to tables at homes and help people create valuable moments worldwide.

Anytime, anywhere!

Our diverse, innovative glassware items and digital services are only a click away. In addition to our rich product lines, you will find delicious recipes, inspiring presentations, seasonal trends, convenient daily suggestions, and other fun content on our LAV social network pages and website that will add value to little moments.

Stay tuned for LAV!

Global reach

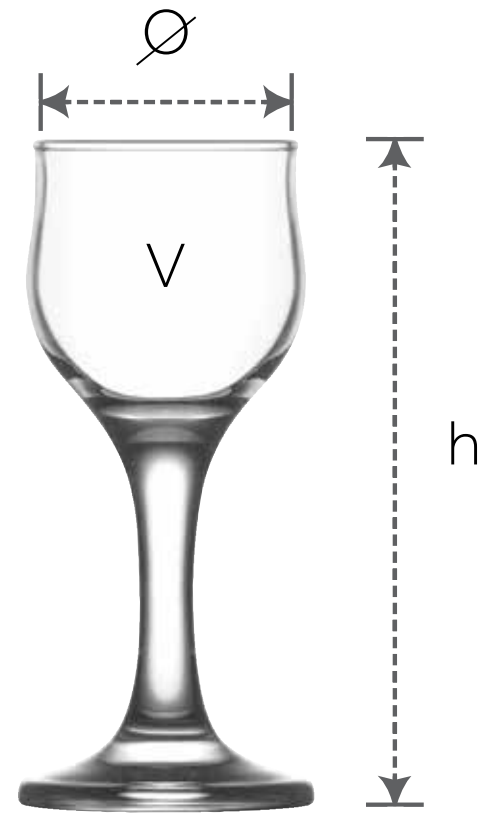

Thanks to the professional and expert approaches of our global team and regional managers, we've had the pleasure of being a part of tens of thousands of tables around the globe. Our commitment to serving customers and business partners around the world has allowed us to reach over 200,000 locations in 140 countries through our 350 sales partners.

We understand the importance of timeliness and accuracy in delivering our products to our customers, which is why we meticulously manage our packaging and shipping processes. Our strong, efficient, and sustainable packaging not only adds value to our business partners' operations, but also ensures that their goods arrive on time and in the best condition possible as they travel around the world.

NEW

gaia - p45

The Gaia family's sophisticated softness and ergonomic efficiency reach new heights with the introduction of two new sizes on opposing ends of the spectrum.

helen - p46 & p91

Exuding retro vibes from a high-end modern design approach sets these glasses apart from the competition. This year, LAV's Helen is even more desirable thanks to three new members.

troya - p68

Footed tumblers with their elevated beauties will always have a leading role in chic tables. This season's new addition to LAV footed tumbler collection Troya will enhance the lux feel of your servings.

archie - p45

LAV views design disciplines as intertwined strings that inspire one another. The new Archie glasses inherits the arches of architecture, allowing the tables to more closely complement their surroundings.

cozy - p89

Glass is the go-to material for all the drinks, from hot to chilled. From the darkest espressos to lighthearted lattes, the stackable new Cozy family will let you enjoy every shade of coffee.

lily - p71

As humans, we require the comfort of familiarity, and nature-inspired interpretations of classic designs like Lily are the ideal way to incorporate it into our daily life.

fresco - p103

High-quality glass containers, such as the new deeper Fresco with locking lids, keep your food fresh. They are also nutritional aides, allowing you to bring along the delicious and healthy food you prepare.

mia - p93

LAV bowls suit to every occasion with a variety of sizes. The new Mia bowls come in 7 different sizes, allowing you to serve everything from sauces to salads.

**MODERN GRACE**

The LAV Fame family captures the essence of modern elegance, with different-sized wine glasses and a champagne flute that are as visually appealing as they are functional. The wine glasses, suited for both robust reds and delicate whites, and the sleek flute, great for sparkling wines and prosecco, are designed to enrich your beverage experience. This collection is a monument to the craft of exquisite glassware, expressing the spirit of contemporary elaborateness, and is a must-have for every modern house.

BLUE MAGIC

For giving bright blue colors to drinks and cocktails with a natural ingredient, butterfly pea flower tea can be a great choice. This tea is made from the petals of the Clitoria Ternatea plant and changes color based on the pH level of the liquid it's added to. It turns bright blue in neutral solutions but can change to purple and pink when mixed with acidic ingredients like lemon or grapefruit juice.

ORANGE PEEL & WHISKEY

Orange peel is a traditional ingredient in many classic whiskey cocktails, such as the Old Fashioned. These recipes have influenced modern cocktail culture over time. However, there are numerous other reasons for this pairing. The oils in the peel contain citrus and floral notes that complement and enhance the flavors of whiskey. These oils add a fresh, zesty element to the drink, balancing the whiskey's richness and depth. When an orange peel is squeezed or twisted, it contributes to the cocktail's aroma. Finally, the peel's bright color and appealing shape make the glass more inviting.

ACCIDENTAL FRUIT
Grapefruit is a hybrid citrus fruit that originated in Barbados in the 18th century by the random hybridization of the sweet orange and pomelo. Grapefruit juice is high in nutrients and has numerous health benefits. It is high in fiber, which promotes heart and gut health and aids in weight management. The fruit is high in vitamin C, which is essential for a healthy immune system, and vitamin A, which is good for eye health. Furthermore, grapefruit contains antioxidants such as lycopene, which may aid in the prevention of serious diseases such as cancer. Because of its balanced carbohydrate and fiber content, it can also be consumed by people with diabetics

COLOR OF HEALTH

Because of their high concentration of vitamins, minerals, dietary fibers, and bioactive compounds, red fruits and berries such as strawberry, raspberry, cherry, cranberry, pomegranate, red currant, and goji berry provide a variety of health benefits. These fruits are high in vitamins A, C, and E, as well as minerals such as calcium, phosphorus, iron, magnesium, potassium, sodium, manganese, and copper. They are known for their high antioxidant properties, which are derived from vitamins and minerals that remain intact because red fruits are typically consumed fresh. They are a great breakfast alternative prepared quickly with a bowl of yoghurt on busy days, and are ideal for satisfying your post-dinner sweet tooth in a healthy way.

MEANINGFUL TABLES

Plant materials and flowers have been used to create visually appealing compositions since ancient civilizations such as Egypt, where lotus flowers were placed in vases. Fresh-cut flowers are essential for creating an atmosphere and theme for the setting. They can be used to improve a table's aesthetic appeal, add color and texture, and create a focal point. The choice of flowers, arrangement, and style can all have a significant impact on the overall look and meaning of the table setting. Yellow roses, for example, traditionally represent friendship, joy, and caring, making them an ideal decoration for friend gatherings.

JOY IS IN THE RIGHT GLASS

Different beer styles are best drunk in specific glasses designed to showcase their distinct features. A Pilsner glass should be taller and open-rimmed which highlights the color and carbonation of lighter beers, but a Snifter glass with a wide bottom and a relatively narrow top is great for strong ales, emphasising their smells and flavors. The correct glassware can also effect the beer's head retention and temperature, which are important for full flavor development. Furthermore, utilizing excellent glasses adds visual and physical pleasure to the beer-drinking experience, making it more delightful.

Shaken or Stirred

Cocktails are becoming more popular not only in bars but also among a wider audience as a result of the DIY movement and easily accessible recipes. Cocktails must be presented in glasses that are appropriate for their flavors, textures, and ingredients in order to appeal to a wide range of tastes and preferences. The choice of glasses determines not just the visual appeal of the cocktails, as seen in these captivating LAV glasses, but also their flavor, scent, and entire experience.

THE SOCIAL DRINK

Tea is a crucial aspect of Turkish culture, and it is drunk in a unique and traditional way. Turkish tea is usually a strong black tea. It is primarily grown along the eastern Black Sea coast. The tea is made in a two-tiered teapot known as "çaydanlık." The water in the bottom pot is brought to a boil. The loose tea leaves are placed in the top pot, which is placed over the boiling water to steep, using the steam from the bottom pot. Turkish tea is served in these lovely tulip-shaped glasses. This design is not only beautiful but also functional, since it allows the tea to cool evenly and may be held comfortably with two fingers from the rim.

Tea is a social activity in Turkey. Tea is commonly consumed in cafes, at home with visitors, or during work breaks. Tea is frequently served with little appetizers or desserts. In Turkey, tea is consumed throughout the day. It's a popular morning beverage, a dinner companion, and a calming drink in the evening. Offering guests tea is a show of hospitality that is firmly ingrained in Turkish culture. It is sometimes considered disrespectful to refuse tea when it is given. Tea is a symbol of hospitality and companionship in Turkish social life, and its purpose is more than just a beverage.

timeless patterns

open & discover 

This season's retro 70s style reflects the reassuring feeling of the past. Timeless patterns wink at both the present and the past, bringing a nostalgic positivity to everyday tables with their organic and curved patterns, clear lines, and bold colors with an accent of gold.

POP Displays

COLORFUL AND EFFECTIVE

As LAV, we believe that how a product is packaged, advertised, and displayed in stores should all work together to send a consistent message. The importance of packaging and display in overall branding cannot be overstated. So, in order to instill a strong sense of brand appreciation and recognition in our target audience, we created a link between the two that best showcases the benefits of both. Aside from having an outstanding design that immediately captures the attention of our target audience, our packaging and displays are able to travel from one point to another easily and with little to no damage. We apply our award-winning product design approach to displays and packaging. A package or a display is also a LAV product, and each one must be sustainable, durable, modern, unique, target audience oriented, and aesthetically pleasing.

Packaging Types

GLASSIFIED

about LAV...

Since its establishment in 1994, LAV has taken a leading role in the glassware industry thanks to its focus on market, customer, technology and innovation. Its facilities located in Kütahya, LAV is the world's fifth largest glassware manufacturer, supplying 2 million items every day with a large range of tumblers, stemware, bowls and etc. Today, LAV employs 2,000 people, with its sales and marketing office in Istanbul and two production plants built on a 300,000 square meter area in Kütahya.

LAV exports its innovative and unique glassware products to 140 countries, including France, Spain

and USA in particular, as well as Brazil, the Philippines and China. It does this thanks to its globally extensive distribution and sales network, which reaches different landmark based countries around the world such as Zanzibar, Mauritius Islands, Victoria Falls, Tokyo, Sydney, etc.

LAV carries out its research and development activities on glassware production technologies at its Technopark facility, which is described as a "plant within a plant." Built in 2001, the innovation-focused Technopark is one of the three companies in the world which creates its own production technology.
